Rapid Transaction Entry

Why force your employees to process drop-box deposits one at a time? There has to be a more efficient way to manage multiple transactions of the same type, performed on different accounts. The answer is CUTEK's Rapid Transaction Entry (RapidTran).

RapidTran allows users to conduct multiple transactions of the same type for multiple accounts. This drastically reduces the amount of time it takes to process these bulk transactions. That, in turn, saves you labor dollars.

RapidTran works by allowing employees to enter multiple accounts and perform like transactions on each of them. As the transactions are posted, RapidTran displays and updates the status of each posted transaction and alerts the employee of any possible issues. This enhances accuracy.

KEY FEATURES

Single screen interface for multiple transactions (e.g., check deposits, loan payments)

Status recap while posting

Access to multiple accounts

Option to support Regulation CC holds

Faster than "Repeat Mode" entries
